APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/708,601	03/14/2004	Po-Chun Yang	ACMP0180USA	2600
27765	7590	06/12/2006	EXAMINER	
NORTH AMERICA INTELLECTUAL PROPERTY CORPORATION P.O. BOX 506 MERRIFIELD, VA 22116			MASKULINSKI, MICHAEL C	
			ART UNIT	PAPER NUMBER
			2113	
DATE MAILED: 06/12/2006				

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/708,601	<b>Applicant(s)</b> YANG, PO-CHUN	
	<b>Examiner</b> Michael C. Maskulinski	<b>Art Unit</b> 2113	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 14 March 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 and 3-10 is/are rejected.
- 7) ☒ Claim(s) 2 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 March 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Non-Final Office Action**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-6, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Colligan et al., U.S. Patent 6,298,443 B1.

Referring to claim 1:

a. In column 2, lines 35-40, Colligan et al. disclose problems that occur in a hard disk such as corruption of files, change of operating system, a bad factory software download, and a malfunction of the hard drive. It would be inherent to the system of Colligan et al. to have an application program containing an error checking algorithm in the electronic device; starting the application program to access the application data; executing the error checking algorithm to check for errors in the application data.

b. In column 9, lines 14-18, Colligan et al. disclose that the restoration program clears the hard disk drive by formatting the hard drive to erase possibly corrupted data, insure proper operation of the drive, and eliminate any viruses that may have infected the drive (and erasing the application data if the error checking algorithm detects an error in the application data).

Referring to claim 3, in column 9, lines 33-38, Colligan et al. disclose that following the second reboot operation, the computer is in the identical condition of the computer at the original delivery (wherein the section of the memory is reset to an initial status after the application data is erased from the section of the memory).

Referring to claim 4, in column 9, line 33, Colligan et al. disclose rebooting the computer after erasing the hard disk drive (wherein the electronic device is restarted after the application data is erased).

Referring to claim 5, in column 2, lines 35-40, Colligan et al. disclose problems that occur in a hard disk such as corruption of files, change of operating system, a bad factory software download (wherein the error checking algorithm determines the error in the application data to be a logical error).

Referring to claim 6, in column 9, lines 6-10, Colligan et al. disclose a hard disk drive (wherein the memory is a nonvolatile memory).

Referring to claim 10, in column 4, lines 62-65, Colligan et al. disclose that the electronic device is a computer.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2113

4. Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Colligan et al., U.S. Patent 6,298,443 B1.

Referring to claim 7, in column 9, lines 6-10, Colligan et al. disclose a hard disk drive. However, Colligan et al. don't explicitly disclose that the memory is a flash memory. The Examiner takes Official Notice that a flash memory is well known and to implement a non-volatile device such as a hard disk drive with a flash memory is well known. Examples of this include memories in PDA's, cell phones, digital cameras and other devices that are too small to hold a hard disk drive but require a non-volatile memory. It would have been obvious to one of ordinary skill at the time of the invention to use a flash memory in the system of Colligan et al. A person of ordinary skill in the art would have been motivated to make the modification because a hard disk drive is not always practical especially in small devices. Further, storing and erasing of data is part of a flash memory just as much as a hard disk drive. To use a method for a hard disk drive with a flash memory requires nothing more than simple engineering and components.

Referring to claims 8 and 9, in column 4, lines 62-65, Colligan et al. disclose that the electronic device is a computer. However, Colligan et al. don't explicitly disclose a mobile phone or a personal digital assistant (PDA). The Examiner takes Official Notice that is well known to have computers or at least a processor and storage device in many different components. Examples include cars, kitchen appliances, large appliances, televisions, cell phones, and PDA's. It would have been obvious to one of ordinary skill at the time of the invention to computer system of Colligan et al. in a

Art Unit: 2113

cellular phone or a PDA. A person of ordinary skill in the art would have been motivated to make the modification because as mentioned above these devices contain at least a processor and a memory. It would be obvious to extend a method for a computer system to these types of systems.

### ***Allowable Subject Matter***

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art is related to detecting corrupted data and erasing a storage in response.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Maskulinski whose telephone number is (571) 272-3649. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert W. Beausoliel can be reached on (571) 272-3645. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2113

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
